

digitale verwerking van gevonden informatie

eric sieverts

GO Opleidingen - LKCA - november 2015
Klantgericht informatie opsporen en rapporteren

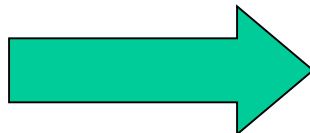

digitale verwerking van gevonden informatie

bestemming:

- jijzelf
- individuele opdrachtgever
- groep opdrachtgevers / belangstellenden
- blijvende collectie informatiecentrum

digitale verwerking van gevonden informatie

- web-pagina
- uit database

- tekstverwerker
- e-mail
- web-pagina
- wiki
- webkrant
- workspace
- social bookmarks
- files op disk
- eigen database
- (google history)
-

digitale verwerking - downloaden

hoe krijg je het uit het systeem? (*downloaden*)

- windows knip & plak
 - pas op: soms onverwachte lege regels en inspringingen
- browser “save as” functie voor hele pagina
 - plain text (.txt) *[soms]*
 - Webpage, HTML Only (1 file: alleen HTML-code van pagina)
 - Webpage Complete (heleboel files; ook plaatjes, scripts enz)
- pdf-file "save as"
- hulpprogramma in browser/tablet/...
 - zotero →
 - evernote →
 - ...

digitale verwerking - downloaden

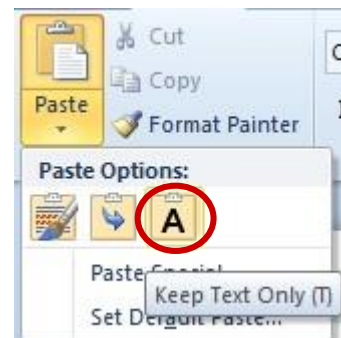

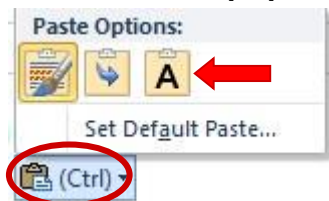

hoe krijg je het uit het systeem? (*downloaden*)

- resultaat uit database via webbrowser
(bijv. uit Ovid, Ebsco, LexisNexis of PubMed)
 - als zo-even
 - vaak extra optie voor printen/downloaden van hele zoekresultaat of selectie in apart “kaal” browser-venster
(*vooral voor import in eigen database*)

verwerken van zoekresultaten

wat doe je er daarna mee?

- plakken en editen in tekstverwerker
 - meestal geen probleem (*in Acrobat ook uit PDF tekst te selecteren*)
 - soms opmaakproblemen door meecopiëren van web-opmaak
 - voor "plakken" biedt Word keuze tussen:
 - “paste” (*inclusief opmaak*)
 - “paste special” (*ook platte tekst te kiezen: “Keep Text Only”*)
 - of achteraf op plak-icoontje klikken

verwerken van zoekresultaten

wat doe je er daarna mee?

- op webpagina op intranet of extranet zetten
- verwerken in (*afgeschermd*) WIKI op internet
- publiceer materiaal in een webkrant
- hele documenten/files uploaden naar speciale sites
- (stukjes) van pagina's/documenten, links, notities bewaren
- links als geannoteerde of getagde bookmarks bewaren op “social bookmarking” site
- in eigen zoekstelsel stoppen

op veel van dergelijke sites zijn collecties naar keuze privé te houden of (beperkt) openbaar te maken

overzicht "*reference management tools*":

- http://libguides.library.uu.nl/comparison_reference_management_tools

verwerken van zoekresultaten

wat doe je er daarna mee?

- op webpagina op intranet of extranet zetten
gebruik liefst eenvoudige html-editor als je nog iets wilt aanpassen
 - de tekst zelf
 - pdf's en html zo laten
 - platte tekst (ascii) omzetten naar html
 - lijstje hyperlinks
 - links naar oorspronkelijke (externe) lokaties
 - links naar (interne) plek waar je resultaten heen gecopieerd hebt
(daar kun je tenminste zorgen dat ze niet verdwijnen, maar wees attent op copyright-issues !)
- verwerken in (afgeschermd) WIKI op internet
 - <http://www.pbworks.com/>
 - <http://www.wikispaces.com/>
 -

verwerken van zoekresultaten

wat doe je er daarna mee?

- op webpagina op intranet of extranet zetten
- verwerken in (*afgeschermd*) WIKI op internet
- publiceer materiaal in een webkrant met content curation tools zoals:
 - paper.li [*vb*, *vb*]
 - scoop.it [*vb*]
 - [storify](http://storify.com) [*tweets*, *vb*, *vb*]
 - [nuzzel](http://nuzzel.com) [*tweets*, *no curation*, *vb*]
- hele documenten/files uploaden naar speciale sites
- (stukjes) van pagina's/documenten, links, notities bewaren
- links als geannoteerde of getagde bookmarks bewaren op “social bookmarking” site
- in eigen zoekstelsel stoppen

verwerken van zoekresultaten

wat doe je er daarna mee?

- op webpagina op intranet of extranet zetten
- verwerken in (*afgeschermd*) WIKI op internet
- publiceer materiaal in een webkrant
- hele documenten/files uploaden naar sites als:
 - <https://dropbox.com/>
 - <https://drive.google.com/> (google - docs)
 - <https://onedrive.live.com/> (microsoft - one-drive)
 -
- (stukjes) van pagina's/documenten, links, notities bewaren
- links als geannoteerde of getagde bookmarks bewaren op “social bookmarking” site
- in eigen zoekstelsel stoppen

verwerken van zoekresultaten

wat doe je er daarna mee?

- op webpagina op intranet of extranet zetten
- verwerken in (*afgeschermd*) WIKI op internet
- publiceer materiaal in een webkrant
- hele documenten/files uploaden naar speciale sites
- (stukjes) van pagina's/documenten, links, notities bewaren
 - Evernote <https://www.evernote.com>
 - Zotero <https://www.zotero.org/>

Google: Our new system for recognizing faces is the best one ever

by Derrick Harris @derrickharris MARCH 17, 2015, 5:05 PM EST

New advances in facial recognition are a step forward for an artificial intelligence technique called deep learning.

"I never forget a face," some people like to boast. It's a claim that looks quainter by the day as artificial intelligence research continues to advance. Some computers, it turns out, never forget 260 million faces.

Last week, a trio of Google (**GOOG** \downarrow **-1.15%**) researchers **published a paper** on a new artificial intelligence system dubbed FaceNet that it claims

Google Schema Adds Support For Business Telephone Numbers & Hours Of Operation

Apr 8, 2014 at 8:55am ET by [Barry Schwartz](#)

Share 97 Tweet 479 +1 78 in Share 149 Buffer 52

Google [announced](#) they now support improved schema markup, rich snippets, for location pages.

Business Phone Support Schema

Google said they now support showing business telephone numbers for customer service, technical support, billing support, and bill payment. For each phone number you markup, you can specify if it is toll-free, suitable for the hearing-impaired, and whether the number is global or serves specific countries. Technically, you can specify more than those four categories but Google only will display those in the rich snippets. Google has added more details [over here](#).

Hours Of Operation

On your business website's contact us or branch locator page, you can now include additional markup to address of the business, the phone number, opening hours, and other information. You can even break it out by services or departments, which may be available at the business locations.

Here is a screen shot that shows the data Google may display in the rich snippets, after you add the schema to your site:

A survey of approaches for ranking on the web of data

Item Type Journal Article

Title A survey of approaches for ranking on the web of data

Author Roa-Valverde, Antonio

Author Sicilia, Miguel-Angel

Abstract Ranking information resources is a task that usually happens within more complex workflows and that typically occurs in any form of information retrieval, being commonly implemented by Web search engines. By filtering and rating data, ranking strategies guide the navigation of users when exploring large volumes of information items. There exist a considerable number of ranking algorithms that follow different approaches focusing on different aspects of the complex nature of the problem, and reflecting the variety of strategies that are possible to apply. With the growth of the web of linked data, a new problem space for ranking algorithms has emerged, as the nature of the information items to be ranked is very different from the case of Web pages. As a consequence, existing ranking algorithms have been adapted to the case of Linked Data and some specific strategies have started to be proposed and implemented. Researchers and organizations deploying Linked Data solutions thus require an understanding of the applicability, characteristics and state of evaluation of ranking strategies and algorithms as applied to Linked Data. We present a classification that formalizes and contextualizes under a common terminology the problem of ranking Linked Data. In addition, an analysis and contrast of the similarities, differences and applicability of the different approaches is provided. We aim this work to be useful when comparing different approaches to ranking Linked Data and when implementing new algorithms.

Abstract

BACKGROUND: Hearing disorders: amplified and low-intensity music, l

AIMS: To compare the incidence o

METHODS: We performed a histo

insurance contributions. The study

years 2004-2008 with about 7 millio

(NIHL), conductive HL, sensorineu

and federal state. A Cox regressio

subentities.

RESULTS: More than 3 million ins

year observation period, 283,697 c

unadjusted incidence rate ratio of 1.27. The adjusted hazard ratio of musicians was 1.45 (95% CI 1.26 to 1.65) for HL and 3.61 (95% CI 1.81 to 7.20) for NIHL.

CONCLUSIONS: Professional musicians have a high risk of contracting hearing disorders. Use of already available prevention measures should reduce the incidence of HL in professional musicians.

March highlights from the world of scientific publishing | [sharmanedit](#) wordpress.com

“ RT @sharmanedit: Did you see the claim that 50% of papers are never read & 90% never cited? Not true, as I detail here: <http://t.co/az9ZwKS...>

verwerken van zoekresultaten

wat doe je er daarna mee?

- in eigen zoekstelsel stoppen
 - opslaan in/als files op disk
 - doorzoekbaar met “indexerings-software” / zoekmachine
(bijv. dtSearch of desktop-search van X1, Copernic, Exalead en voor specifieke collecties ook Evernote)
 - opslaan in eigen database
 - doorzoekbaar met “bibliographic software” / "reference management software"
[op eigen PC/desktop en/of online "in the cloud"]
(bijv. EndNote, Reference Manager, Refworks, Mendeley of Zotero)

opslaan van zoekresultaten

wat doe je er daarna mee?

- opslaan in/als files op disk

indexeringssoftware / zoekmachine maakt alle soorten tekstbestanden (ascii, html, word, wp, pdf, xml, ...) op elk soort schijf full-text doorzoekbaar

- verschil in opmaak/format geen probleem, want indexeert alle tekst en laat resultaat meestal in oorspronkelijke opmaak zien
- bij download van hele lijst resultaten uit online database in één file zijn losse artikelen daarbinnen geen afzonderlijke records
 - geen ernstig probleem, omdat je van hit naar hit kunt springen
- ondersteunt geen veldstructuur - maar soms (*dtSearch*) kun je toevallig aanwezige markeringen met velden associëren

<title> → titel

TI: → titel

<author> → auteur

AU: → auteur

zoekresultaten importeren in database

wat doe je er daarna mee?

- importeren in eigen database

bibliographic software zoals EndNote, Reference Manager, Refworks, Mendeley, Zotero, ...

- geheel voorgedefinieerde veldstructuren voor beschrijven van standaard materiaalsoorten
- voorgedefinieerde import-modules ("connectoren") voor gedownloade gegevens uit soms honderden verschillende bronnen (*vooral bibliografische databases*)
- vooral bedoeld om hieruit literatuurlijsten te genereren bij zelf te schrijven artikelen (maar ook algemener toe te passen)
- daarvoor ook vele voorgedefinieerde tijdschriftstijlen aanwezig

zie bijv. overzicht "*reference management tools*":

registratie van wat je hebt gedaan

- logboek met
 - wanneer gezocht
 - waarin gezocht (bron, zoekstelsel, ...)
 - gebruikte (combinaties van) zoektermen
 - resultaat (hoeveel, hoe goed, ...)
- makkelijk automatisch alternatief: google history (alleen voor zoekacties in Google-producten)
 - registreert zoekacties op datum
 - gegevens blijven tenminste 10 jaar bewaard
 - onthoudt gebruikte zoekwoorden
 - onthoudt welke pagina's uit zoekresultaat zijn aangeklikt
 - is doorzoekbaar
