# verbeteren van zoekresultaten

wat is er mis met mijn zoekresultaat?

- te veel relevante publicaties gemist - slechte "vangst"  
*(dus te weinig - of zelfs geen - relevante publicaties gevonden)*
- te veel niet-relevante publicaties gevonden - slechte "precisie"  
*(dus te moeilijk om wel-relevante er handmatig uit te filteren)*
- oorzaken en mogelijke remedies daarvoor

# te veel gemist (1)

1. niet in geschikte database/zoekmachine/.... gezocht  
**remedie:** kies andere database/zoeksysteem
2. vraag over-gespecificeerd  
**remedie:** laat minst belangrijke / impliciet concept weg
3. spellingfout gemaakt  
**remedie:** controleer tussenresultaten op te verwachten aantallen

## Aspirin

The prototypical analgesic used in the treatment of mild to moderate pain. It has anti-inflammatory and antipyretic properties and acts as an inhibitor of cyclooxygenase which results in the inhibition of the biosynthesis of prostaglandins. Aspirin also inhibits platelet aggregation and is used in the prevention of arterial and venous thrombosis. (From Martindale, The Extra Pharmacopoeia)
